

## **PRODUCT WARRANTY**

Stackpole Electronics, Inc. (SEI) warrants that its products, at the time of shipment, conform to all pertinent specifications and are free from defects caused by faulty materials or workmanship. SEI makes no other warranties, express or implied to purchaser except as herein stated, and specifically SEI makes no warranty as to the product's merchantability or fitness for any particular use or purpose. This warranty does not extend to any product which fails to operate because of misapplication or has been subject to misuse, neglect or accident, has been repaired or substantially altered, or has not been stored under proper conditions as recommended by SEI. Components sold by Stackpole Electronics, Inc. are not recommended for use in critical life application or life support systems unless otherwise stated expressly in written form to the purchaser. The warranty period is effective for one (1) year from date of shipment for all products other than the RC series of carbon composition resistors, for which the warranty period is six (6) months from date of shipment.

All claims for alleged defects in the products shall be deemed waived unless made in writing and delivered to SEI within one (1) year of shipment of the alleged defective products to purchaser. SEI's sole liability with respect to the products shall be limited to the repair, replacement or refund of the invoiced purchase price of any defective products. SEI, at its discretion, shall determine on a case-by-case basis whether repair, replacement or refund will be the remedy respecting any such defective products. Such repair, replacement or refund shall be the sole remedy that purchaser of the product shall have against SEI with respect to the quality, performance or use of the product. All other remedies which purchaser might have against SEI, statutory or otherwise, including, without limitation, the recovery of special, incidental, consequential or punitive damages, are hereby expressly excluded.
