

PRESS RELEASE

CSRF0402 and CSRF0603 Low Resistance Values Ideal for Portable Consumer Electronics

RALEIGH, NC (May 7, 2014) – The CSRF series is a surface mount current sense resistor series that utilizes foil on ceramic carrier technology. This structure allows for very low resistance values in small case sizes while maintaining good TCR. The 0402 size is available in the popular 10 milliohm value, while the 0603 size is available in values down to 5 milliohms. These low values and outstanding TCR are ideal for portable consumer electronics which are constantly evolving with smaller sizes and more functions. Lower resistance values mean more efficient battery and power management and longer battery life.

Applications:

- Laptops
- Netbooks
- Tablets
- E-readers
- Portable media players

Pricing for the CSRF varies with size, value, and tolerance, and ranges from \$0.10 to \$0.30 each in full reel quantities. Contact Stackpole for volume pricing. Many popular sizes and values are in stock or available through online distribution.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email marketing@seielect.com or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
