

PRESS RELEASE

High Voltage Resistors Now Offer Working Voltage Ratings up to 7000 Volts

RALEIGH, NC (May. 28, 2014) – Stackpole has expanded and improved its MG series thru hole metal glaze high voltage resistors. The value range for all sizes has been expanded to include values from 1K ohm up to 1G ohm. In addition, working voltages have been improved and now range from 1.6KV for the ¼ watt size to 7KV for the 2W and mini 3W sizes. Metal Glaze technology provides an inherently moisture proof resistive element and is less expensive than many other high voltage resistor types.

Applications:

- Electronic scales and measurement
- Voltage dividers for power supplies
- Medical applications
- Aviation instrumentation
- Security and safety equipment
- Communications infrastructure

Pricing for the MG / MGM varies with size, resistance value, and tolerance, and ranges from \$0.056 to \$0.45 each in full reel quantities. Contact Stackpole for volume pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email marketing@seielect.com or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
