## RMCG Series Chip Resistors are Impervious to Sulfur

**RALEIGH, NC** (June 18, 2014) - The RMCG Series from Stackpole provides a surface mount thick film chip resistor that is impervious to contamination by sulfur. The RMCG Series has inner terminations that are protected by an intermediate layer of gold which is impervious to sulfur. This is superior to other anti-sulfur chips that employ only a reduced silver inner conductor.

The RMCG Series offers sizes from 0402 up to 2512, resistance values from 1 ohm up to 10M, and tolerances as low as 1%.

Pricing for the RMCG varies with size and tolerance and ranges from \$0.0175 to \$0.19 each in full reel quantities. Contact Stackpole or one of our authorized distributors for volume pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email [marketing@seielect.com](mailto:marketing@seielect.com) or visit the website at [www.seielect.com](http://www.seielect.com).

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
