## CSRF0402

Current Sense Chip Now Available down to 5 Milliohms

**RALEIGH, NC** (Feb. 2, 2016) – The popular CSRF series of SMD current sense resistors is now available in resistances down to 5 milliohms in an 0402 chip size. This state of the art low resistance value combined with the small package size allows for efficiency improvement in small portable electronic devices and potential downsizing existing designs. Lower resistance values allows for higher current handling for a given resistor size and lower self-heating at a given current level.

Pricing for the CSRF0402 1% ranges from \$0.18 to \$0.20 each in full reel quantities. Contact Stackpole or one of our franchised distributor partners for volume pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email [marketing@seielect.com](mailto:marketing@seielect.com); or visit the website at [www.seielect.com](http://www.seielect.com).

Stackpole Electronics Inc. is a leading global manufacturer of resistors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group, Stackpole has facilities in Japan, Taiwan, China, the US and Mexico.
