RNCP Series

Chip Resistors are 100% Lead Free Without Exemption

RALEIGH, NC (March 7, 2016) – Stackpole’s RNCP series chip resistors utilize high volume thin film technology to provide cost effective chip resistors that are 100% lead free and RoHS compliant without exemption. The RNCP’s thin film technology doesn’t require the lead containing dielectric as do most commercial high volume thick film chip resistors. Stackpole’s unique materials and design also yield chip resistors with high power ratings, and outstanding anti-sulfur performance with no use of precious metals which can increase costs.

The RNCP is available in sizes of 0402, 0603, 0805, and 1206 in 1% and 5% tolerances. Pricing for the RNCP varies with size, resistance value, and tolerance and ranges from \$0.002 to \$0.01 each. Contact Stackpole or one of our franchised distributor partners for volume pricing. Many popular values and sizes are in stock.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary’s, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group, Stackpole has facilities in Japan, Taiwan, China, the US and Mexico.
