

Stackpole Expands

Small Size Precision Chip Resistor Values

RALEIGH, NC (February 9, 2017) – The RNCF Series from Stackpole is a precision thin film chip resistor series capable of achieving tolerances as tight as 0.01% and TCR as low as 2 ppm/°C. Stackpole recently expanded the resistance value range for the 0402 chip size for all tolerances to offer values from 49.9Ω up to 20KΩ.

For applications that require a 0.1% tolerance and a TCR of ± 10 ppm, the RNCF0402 offers resistance values to 100KΩ. This exceptional performance and wide value range make the RNCF an excellent choice for a broad range of precision applications such as instrumentation, metering and calibration, diagnostic and monitoring equipment, medical devices, and precision controls.

The RNCF0402 is available in tolerances from 0.01% up to 1% and TCRs from 2 ppm to 50 ppm.

Pricing for the RNCF varies with size, resistance value, tolerance, and TCR. Contact Stackpole or one of our franchised distribution partners for pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying to the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
