PV Series

SMD Varistors are ideal for LED lighting applications

RALEIGH, NC (March 1, 2017) – Stackpole’s PV series offers superior voltage protection in a molded surface mount package. Ideally suited for LED drivers, the PV offers working voltages from 11Vrms to 300Vrms so it can handle any design based on 120VAC or 240VAC.

The PV is available in 3225 and 4032 chip sizes and is rated for up to 1200 amps of current and 30J of energy. The plastic molded case provides excellent protection from environmental hazards and the compliant terminations ensure reliable connection and operation under high temperature gradients or board flex.

Pricing for the PV series in low volume ranges from \$0.28 to \$0.42 each depending on size and voltage. Contact Stackpole or one of our franchised distribution partners for volume pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying to the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
