

## HCJ Series

### SMD High Current Jumpers in Sizes from 0402 through 1206 and 2512

**RALEIGH, NC** (July 16, 2018) – Stackpole's HCJ Series, a surface mount chip jumper, offers current ratings ranging from 14.2 amps for the 0402 up to 63.2 amps for the HCJ2512. In comparison, the typical rated current for a standard 2512 thick film jumper is 3 amps. The HCJ0402 has a maximum resistance of 3 milliohms while the other sizes have a maximum resistance of 0.5 milliohms. This ensures much lower power dissipation for the HCJ compared to similar jumpers with typical resistance of up to 50 milliohms. In addition, the HCJ is AEC-Q200 compliant.

The HCJ is available in chip sizes 0402, 0603, 0805, 1206, and 2512 and is 100% RoHS compliant and lead-free. Pricing is size dependent and ranges from \$0.067 to \$0.11 each in full reel quantities. Contact Stackpole or one of our franchised distributor partners for volume pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 3110 Edwards Mill Road, Suite 207, Raleigh, NC 27612; phone 919-850-9500; email [marketing@seielect.com](mailto:marketing@seielect.com); or visit the website at [www.seielect.com](http://www.seielect.com).

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying to the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
