

RNCF Thin Film Chip Resistors for High Precision Application Requirements

RALEIGH, NC (Jan. 21, 2019) – The popular RNCF series from Stackpole is a thin film chip resistor series capable of outstanding precision. From sizes 0201 up to 2512, the RNCF offers 0.01% tolerances for a wide range of resistance values. The RNCF also offers TCR down to 2 ppm for a significant value range for all sizes but the 0201 size. In addition, performance under industry standard tests such as load life and short time overload is exceptional. The excellent electrical and environmental stability make the RNCF a logical choice for a wide variety of precision applications, such as medical equipment, instrumentation, test equipment, calibration, and precision controls.

Pricing for the RNCF varies with size, resistance value, tolerance, and TCR. Contact Stackpole or one of our franchised distributor partners for specific pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 3110 Edwards Mill Road, Suite 207, Raleigh, NC 27612; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying to the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
