

CSSH2512

Ultra Precision Current Sense Chips Expand Resistance Range up to 80 milliohm

RALEIGH, NC (Mar. 5, 2019) – The CSSH2512 from Stackpole is an all metal current sense chip resistor capable of precision tolerances as low as 0.5% and TCR as low as 15 ppm. The resistance range for the 3W 2512 size chip has been expanded and now spans from 0.5 milliohm up to 80 milliohm. The high precision combined with the wider value range and higher power rating make the CSSH2512 ideal for a variety of power monitoring and control applications for many types of consumer and industrial electronics.

Pricing for the CSSH2512 depends on resistance value, and tolerance and ranges from \$0.275 to \$0.463 each in full package quantities. Contact Stackpole or one of our franchised distribution partners for volume pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 3110 Edwards Mill Road, Suite 207, Raleigh, NC 27612; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying to the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
