

RNV14

Small Size Robust High Voltage Thru-hole Resistors in Stock

RALEIGH, NC (Aug. 26, 2019) – The RNV series from Stackpole offers a robust ¼ watt size resistor capable of handling up to 7 KV under IEC 60065.14.1 standard testing. The proprietary manufacturing and materials allow the RNV to withstand 1000 hours at 40 °C, 90% relative humidity with cycled power while experiencing very little resistance shift. The RNV14 has a working voltage rating of up to 1600 VDC and an overload voltage rating of 3200 VDC depending on resistance value.

The RNV is ideal for applications requiring high voltage handling capability, high reliability, and stability, such as industrial electronics, switching power supplies, power inverters, AC adapters, appliances, electronic ballasts, and displays and monitors.

The RNV is available in both 5% and 1% tolerances, and in standard ammo and tape and reel packaging. Pricing for 1% tolerances is around \$0.04 each in full reel quantities. Contact Stackpole or one of our franchised distributors for volume pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 3110 Edwards Mill Road, Suite 207, Raleigh, NC 27612; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying to the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
