

RNCF

Precision Thin Film Resistors with 0.01% Tolerance and 5 ppm TCR in Stock

RALEIGH, NC (Sept. 30, 2019) – The RNCF series from Stackpole is a surface mount precision thin film chip resistor series with one of the broadest ranges of resistance values, sizes, tolerances, and TCR's in the industry. The RNCF series has thousands of popular part numbers in stock including many values available in 0.01% resistance tolerance and 5 ppm TCR. This broad stock availability allows rapid prototyping and design validation for a wide range of precision controls and applications requiring exceptional electrical accuracy.

The RNCF is available in sizes from 0201 to 2512, in resistance values from 1 ohm up to 3 Meg, in tolerances as low as 0.01%, and in TCR's down to 2 ppm. Pricing for the RNCF series varies with size, value, TCR, and tolerance and ranges from \$0.023 each to \$1.34 each in full reel quantities. Contact Stackpole or one of our franchised distribution partners for volume pricing.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 3110 Edwards Mill Road, Suite 207, Raleigh, NC 27612; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying to the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
