PRESS RELEASE

Stackpole's CSRF Series of Foil on Ceramic Carrier Current Sense Chip Resistors Adds 0603 and 0402 Sizes

RALEIGH, NC (Apr. 24, 2013) – Stackpole announces the release of the CSRF0603 and CSRF0402 sizes to add to their broad current sense resistor product group. The CSRF0603 is available in resistance values from 5 to 10 milliohms in 1% tolerance and 75 ppm TCR. The CSRF0402 is available in resistance values from 10 milliohms to 15 milliohms in 1% tolerances and 200 ppm TCR.

This makes the CSRF an ideal choice for downsizing portable electronics of all types. Lower resistance values allow for sensing higher currents more efficiently and help lower PCB temperatures for lower current levels..

The CSRF is now available in sizes from 0402 up to 2512. Values range from 3 milliohms to 100 milliohms and in tolerances as low as 1%. Pricing varies with size, resistance value, and tolerance, and ranges from \$0.07 to \$0.30 for the most common values and sizes in full package quantities. Contact Stackpole or one of our franchised distributors for volume pricing. Current lead-times are 8 weeks. Many popular values for the CSRF are in stock or planned for stock.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
