

PRESS RELEASE

Stackpole's MG/MGM Series Ideal for High Voltage Applications in High Humidity

RALEIGH, NC (Sept. 24, 2012) – The MG and MGM series from Stackpole is a high voltage metal glaze series of thru hole resistors. The metal glaze technology utilized to achieve the high voltage ratings is impervious to moisture making them ideal for high humidity applications with high voltage requirements. In addition, the thick film technology is less expensive than many competitive high voltage resistors of similar size and voltage rating.

Applications for the MG / MGM include high voltage power supplies, lighting ballasts, voltage dividers, robotics, welding equipment, industrial controls, plasma cutting equipment, UPS systems, portable medical diagnostic and monitoring equipment, EKG and ECG equipment, and high voltage snubber resistors.

Pricing for the MG / MGM series varies with size and resistance value and ranges from \$0.056 to \$0.45 each in full reel quantities. Contact Stackpole or one of our franchised distributors for pricing inquiries.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
