

PRESS RELEASE

Stackpole's RNCH Series for High Power and High Humidity Applications

RALEIGH, NC (Nov. 6, 2012) – The RNCH is a high power version of Stackpole's award winning RNCS series of anti-corrosive passivated nichrome thin film chip resistors.

The RNCH offers the power rating of the RNCS0805 in the 0603 size and similar power upgrades for the 0805 and 1206 sizes. This allows the RNCS to be used in many more designs and makes it an ideal replacement for high power tantalum nitride based chip resistors which are typically much more expensive. The RNCH is available in resistance values from 25 ohms up to 1M in the 1206 size and can achieve tolerances down to 0.1% and TCR's as low as 15 ppm.

Pricing for the RNCH varies with size, resistance value, tolerance, and TCR and ranges from \$0.02 to \$0.15 each in full reel quantities. Contact Stackpole or one of our franchised distributors for pricing inquiries.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh, NC 27607; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
