

PRESS RELEASE

HMC Series Economical Chip Resistors with Resistance Values Up To 10G Ohms

RALEIGH, NC (Mar. 11, 2013) – The HMC series from Stackpole is a thick film based chip resistor series capable of high resistance values. This series utilizes special high resistance inks and volume production to achieve a chip resistor that is capable of extremely high resistance values without significant cost increase. This makes the HMC a popular choice for gas detection, dividers, wireless equipment, test and measurement equipment, medical devices, instrumentation, and network analyzers.

The HMC is available in sizes from 0402 up to 2512, in resistance values from 10.2M up to 10G, and with tolerances as low as 1%. Pricing varies with size, resistance value, and tolerance, but ranges from \$0.05 to \$0.10 for the most common values and sizes in full reel quantities. Contact Stackpole or one of our franchised distributors for volume pricing. Current lead-times are 8 weeks, with many popular values and sizes available from stock.

For more information about Stackpole products, contact Stackpole Electronics, Inc. at 2700 Wycliff Road Suite 410, Raleigh NC 27607; phone 919-850-9500; email marketing@seielect.com; or visit the website at www.seielect.com.

Stackpole Electronics Inc. is a leading global manufacturer of resistors supplying the world's largest OEMs, contract manufacturers and distributors. Headquartered in Raleigh, N.C., the privately held company began manufacturing in 1928 as part of Stackpole Carbon Company in St. Mary's, Pennsylvania. Now part of the Akahane Stackpole Manufacturing Group (ASMG), Stackpole has manufacturing facilities in Japan, Taiwan, China and Mexico; warehousing facilities in El Paso, Shenzhen and Japan; and international sales offices in Tokyo, Taipei, London, Hong Kong and Shenzhen.
